FLIPRANK

Build your run. Take theirs.

A fast, tactical card game of sequences, timing, and sudden reversals.

RULEBOOK

A standard deck. A clever sequence. One well-timed Intercept can flip the game.

1. The goal

Be the first player to own **three completed sequences**. A sequence is three or more consecutive cards of the same suit. FLIPRANK is about building your own runs while watching for a chance to connect to an opponent's run and take control.

2. What you need

• One standard 52-card deck (remove the jokers).
• 2–4 players.
• A table or flat surface.
• About 15–25 minutes (estimated; playtesting may change this).

3. Card order and valid sequences

Cards run in this order: A, 2, 3, 4, 5, 6, 7, 8, 9, 10, J, Q, K. An Ace may also be used low, before 2. Aces cannot wrap around from King to 2.

Examples of valid sequences

Valid	3♥ – 4♥ – 5♥	Three consecutive hearts
	Q♣ – K♣ – A♣	Ace is high
	A♦ – 2♦ – 3♦	Ace is low
Not valid	K♠ – A♠ – 2♠	Ace cannot wrap around
	3♥ – 4♣ – 5♥	The suits do not match

4. Setup

1. Shuffle the deck.
2. Deal five cards to each player.
3. Put the remaining cards face down in the middle as the draw pile.
4. Turn the top card face up beside it to start the discard pile.
5. The player to the dealer's left takes the first turn.

5. Taking a turn

Step 1 — Draw: Take the top card from either the face-down draw pile or the face-up discard pile.
Step 2 — Discard: Choose one card from your hand and place it face up on the discard pile.
Step 3 — Reveal a sequence (optional): If you have a valid sequence of at least three cards in your hand, you may reveal it and place it face up in front of you. Cards in a revealed sequence are no longer in your hand; they remain on the table and can be affected by Intercept.

6. INTERCEPT!

Intercept is the special move that can change who owns a sequence. You may call it only immediately after another player reveals a new sequence.

How it works
1. Check whether one of your existing sequences connects directly to the newly revealed sequence.

2. The sequences must be the same suit, and the end of one must touch the start of the other with no gap.
3. If they connect, call “INTERCEPT!” before the next player begins their turn.
4. Combine the cards into one continuous run. You now own the combined run, and the other player loses ownership of the sequence they just played.
5. Every complete group of three cards in the combined run counts as a sequence for scoring toward the win. For example, a six-card run counts as two sequences.

Example: taking a connected run

Before	After a successful Intercept
You own: 3♥ – 4♥ – 5♥ Opponent reveals: 6♥ – 7♥ – 8♥	You own: 3♥ – 4♥ – 5♥ – 6♥ – 7♥ – 8♥ This counts as two sequences. Your opponent owns zero sequences from those cards.

Important: A sequence that has already been on the table for a while cannot be intercepted. Only the sequence that has just been revealed can trigger an Intercept. A sequence with a gap or a different suit cannot be intercepted.

7. Long runs and repeated Intercepts

A run may contain more than three cards. Every three consecutive cards within a run count as one sequence toward the win: 3–4–5–6–7–8 counts as two; 3–4–5–6–7–8–9 counts as three. A newly revealed run may itself connect to an existing run, and a successful Intercept transfers ownership of the combined run to the player who called it. Intercepts can create chain reactions, but each Intercept must happen immediately after a new sequence is revealed.

8. Winning

The first player who owns three completed sequences wins immediately. A player can win by revealing a third sequence or by successfully Intercepting a run that gives them three sequences. If more than one player appears able to win from the same reveal, resolve a valid Intercept first; otherwise, the player who revealed the sequence wins.

9. Draw pile runs out

If the draw pile runs out, shuffle the discard pile except for its top card to make a new draw pile. If there are no cards available to draw, skip the draw step and continue the turn with any cards remaining in hand.

10. Quick reference

Goal	Own three sequences.
Sequence	3+ consecutive ranks, all in the same suit.
Turn	Draw 1, discard 1, optionally reveal a valid sequence.

Intercept	Immediately connect to a newly revealed sequence and take ownership of the combined run.
Long run	Every three cards count as one sequence toward winning.
